

# VW Injector Programming

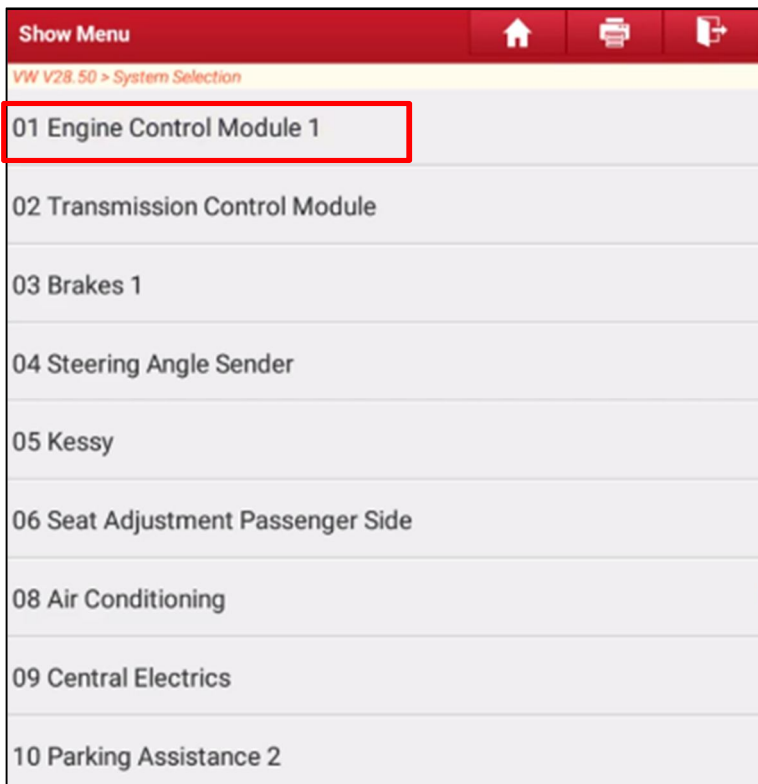

We have a VW Golf, VIN: VINLWVGZZZ7LZ700\*\*\*\*\*, need to do injector programming.

1. Write down the number of the injector correctly, like don't mix one with letter "L", zero with letter "O" and other normal mistake.
2. Enter Local diagnose and find VW.

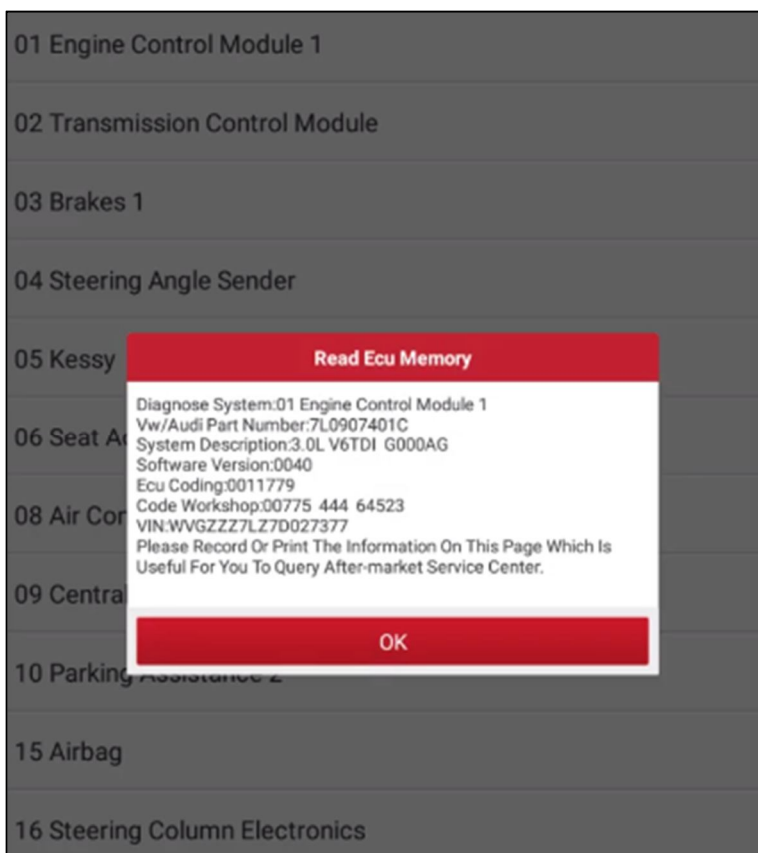

3. Enter VW software and choose System Selection, find "01 Engine Control Module 1" system.

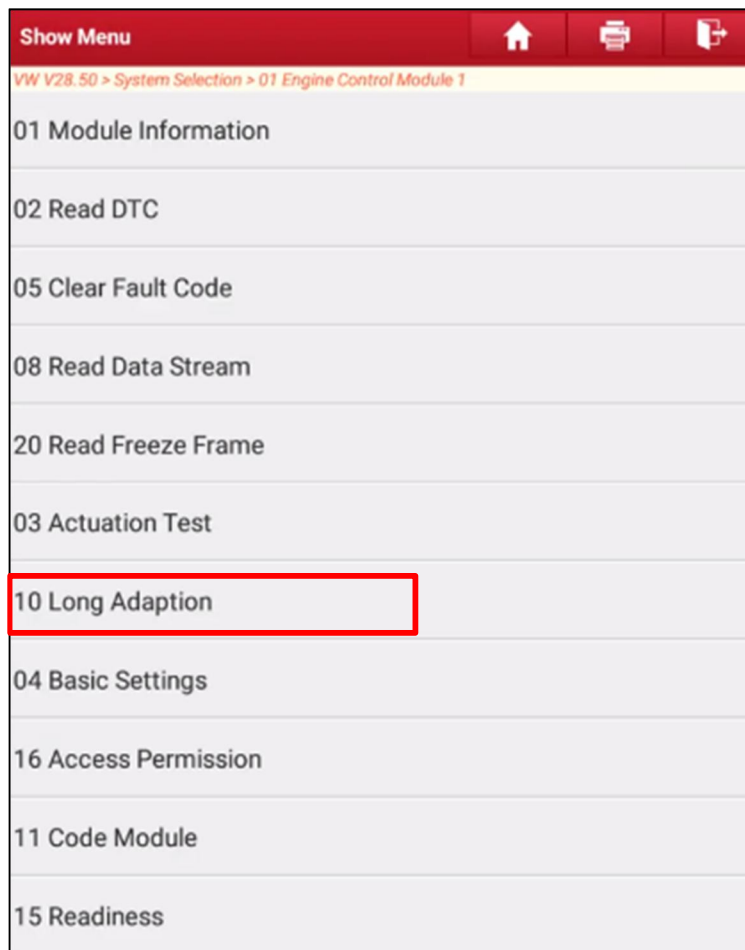

4. Enter "01 Engine Control Module 1" system , the scanner will read ECU memory, and you need to record or print the information on this page which is useful for you to query after-market service center.

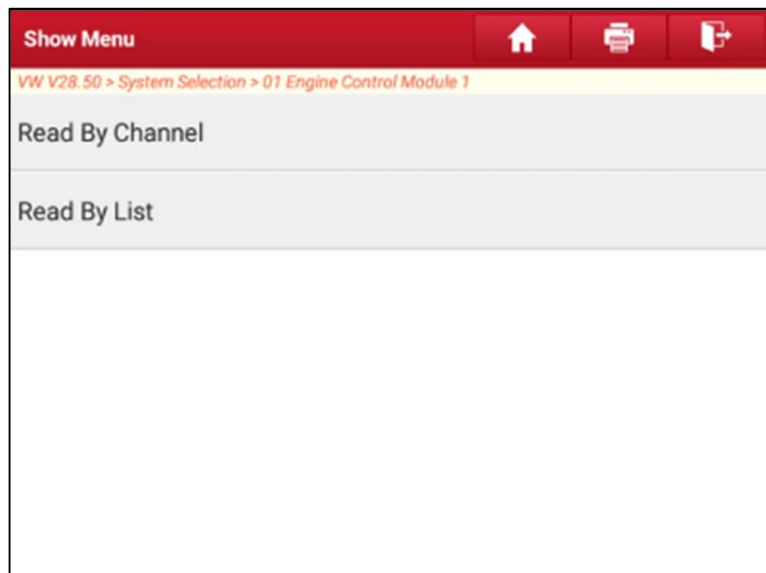

5. After record the ECU information, please click "OK" to continue.

6. Choose "Long Adaption" on this page.

7. Choose read by List.

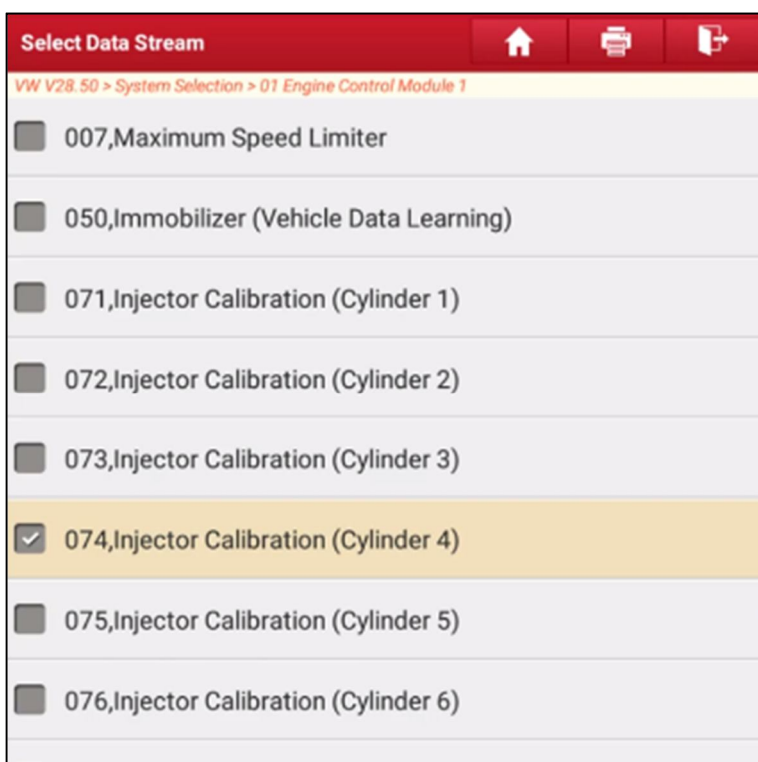

8. After you choose read by list, it will list all the items can be programmed out. You need to choose the one which you want to programmed.

- 1) Speed Limiter.
- 2) Immobilizer
- 3) Injectors, DPF replacement and others.

9. Select the injector which you need to programming, here we chose 074 injector Calibration (Cylinder 4).

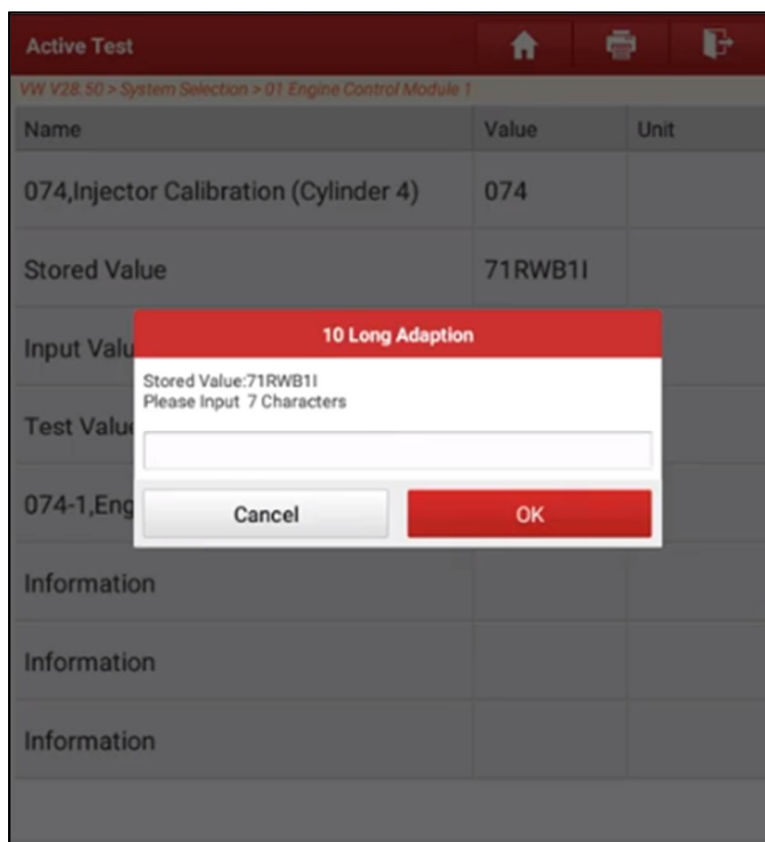

10. Then we arrived this menu,

Name	Value	Unit
074,Injector Calibration (Cylinder 4)	074	
Stored Value	71RWB11	
Input Value		
Test Value		
074-1,Engine Speed,(G28)		
Information		
Information		
Information		

Select input Value, and input the correct number of the injector and click OK.

Name	Value	Unit
074,Injector Calibration (Cylinder 4)	074	
Stored Value	71RWB11	
Input Value		
Test Value		
074-1,Eng
