Instruction for the operation of Anti-Theft Key Matching - Add 1 Key for

2015 Honda Jade

# **Tested model**

Honda JADE 2015, VIN: LVHFR1815F600\*\*\*\*

### Features

The process of key matching - Add 1 key.

## Requirements

Product requirement: X-431 IMMO PRO, X-431 IMMO PAD

Software requirement: Honda Anti-theft software V10.01 and above

### Notes

1. You must have an original key;

2. Before performing the operation, ensure that the vehicle battery voltage is not lower than 12V and the device has sufficient power;

3. During operation, strictly follow the device prompts to switch ignition ON/OFF within specified time;

4. After the key registration completed, check whether all the keys normally open and close the doors and start the engine normally.

#### Steps

1. Turn off the ignition switch (if the ignition switch has been turned on), prepare all the keys, and connect the diagnostic device, enter the corresponding IMMO module, and select HONDA Anti-theft diagnostic software, as shown in Figure 1.
