Dear All,

Recently we updated Pad VII App on the following Pad VII configurations,

341183501   X-431 PAD VII passenger car overseas diagnostic configuration (SmartLink V2.0)

341181401   X-431 PAD VII LINK passenger car overseas ato configuration

321192713   X-431 PAD VII LINK passenger car overseas standard configuration

321192707   X-431 PADVII passenger car overseas standard configuration (EU power plug)

321192701   X-431 PADVII passenger car overseas standard configuration
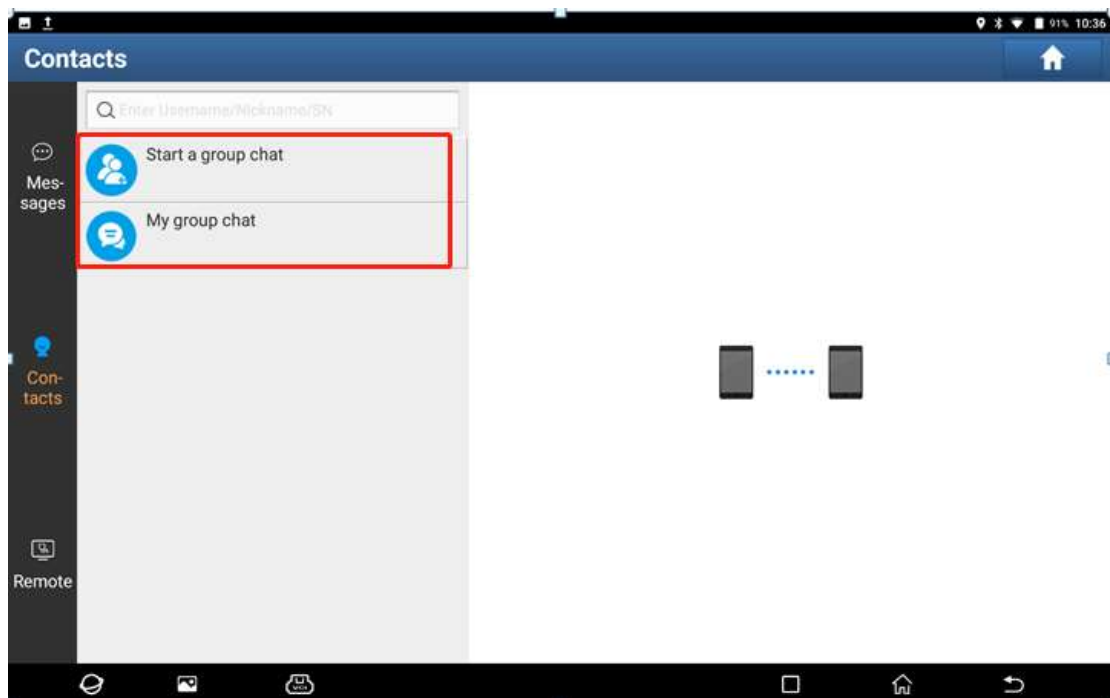

Version：V7.00.030

Features:

● The special function of **ODO CHECK** is added, which is used to read the mileage information in each system of the vehicle.
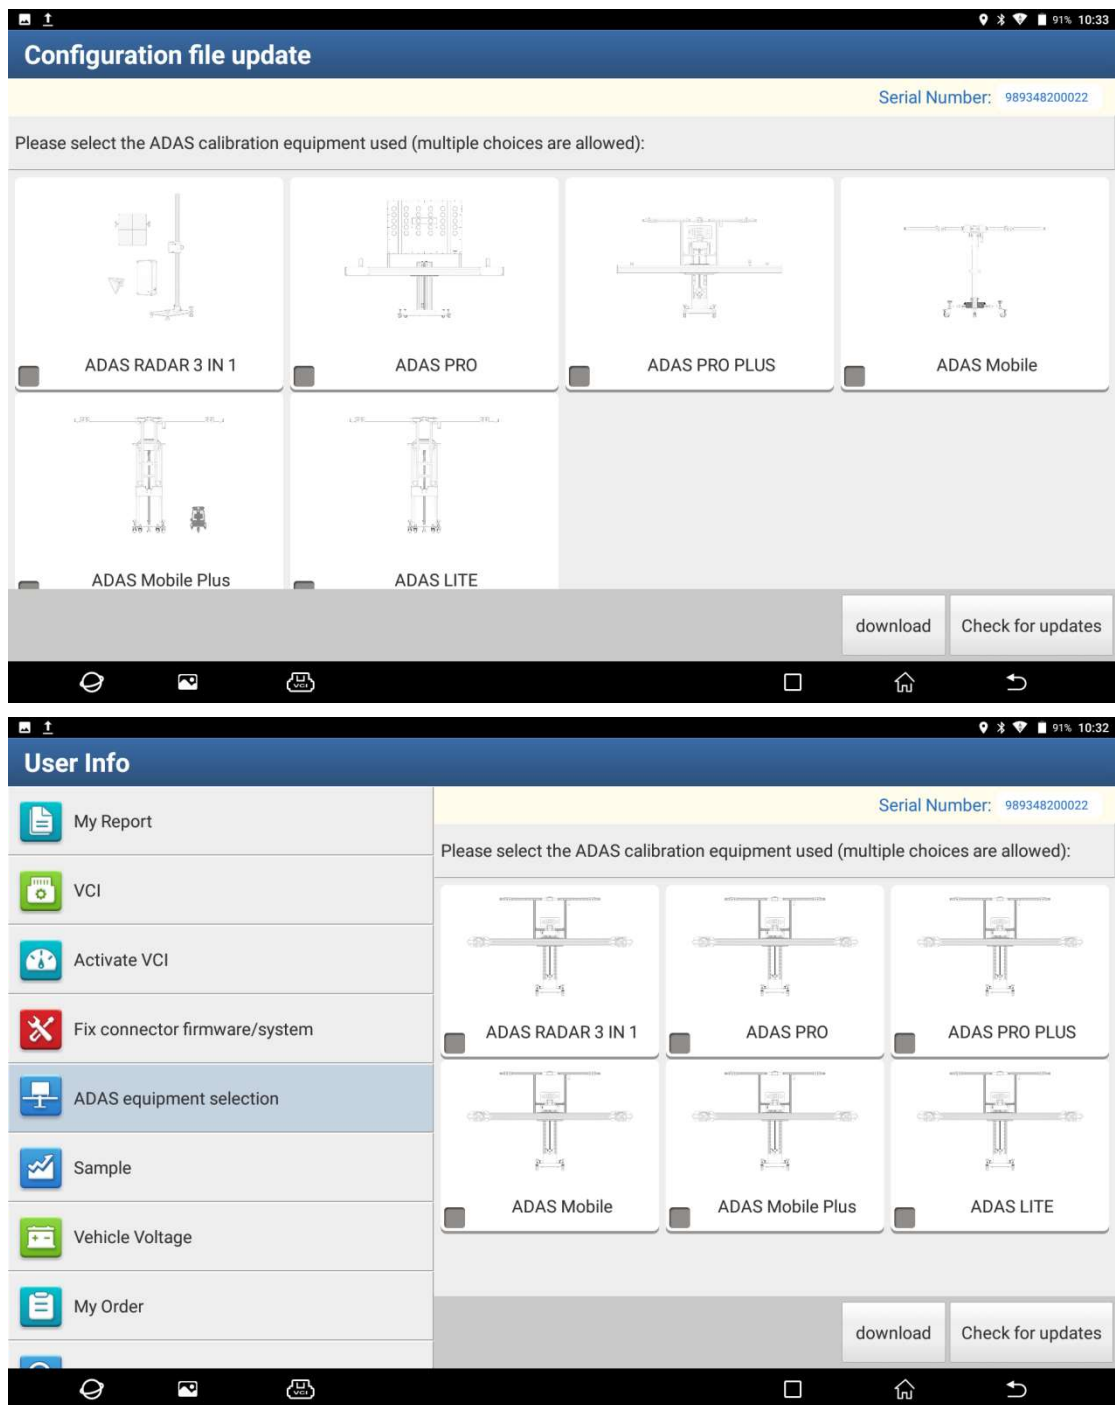

- The special function of **RESETSVIN** is added, which is used to read the VIN information in each system of the vehicle

- **Group chat** function is added to IM

- Online download of configuration files is added to ADAS, so that the help information such as ADAS operation diagram can be quickly updated without updating the vehicle diagnosis software. (Note: when using ADAS for the first time, you will be prompted to update the accessory file, and you will also check the current version and update of the ADAS accessory file at any time when entering [User Info]-[ADAS Equipment Selection].
