Notice on the Implementation of the Charging Policy for the X-613 Wheel Alignment Database

To further improve the service quality and update efficiency of the X-613 Wheel Alignment Database, and to ensure the accuracy, timeliness, and completeness of vehicle data, a charging policy for the X-613 wheel alignment database will be implemented starting April 1, 2026. The details are as follows:

1. Charging Policy

- New Devices (activated on or after April 1, 2026), The database will include 2 years of free updates starting from the device's first activation date.
- Existing Devices (activated before April 1, 2026), the 2-year free update period will begin from April 1, 2026. after the free update period expires, users will need to purchase a renewal card in order to continue receiving database updates.

2. Scope of Application

- this policy applies to the LAUNCH X-613 Wheel Alignment Database currently.

3. Renewal Card Description and Configuration

- Renewal cards are available in two formats: physical cards and virtual cards.
[307010462 Overseas X-613 Database 1-Year Renewal Card \(Physical\)](#)
[307010463 Overseas X-613 Database 1-Year Renewal Card \(Virtual\)](#)
- Physical cards will be distributed through authorized distributors, while virtual cards will be delivered via email.

- One card for one device only, cannot be shared between devices.
- Each renewal card contains a unique activation code. After successful activation, the database update service validity will be extended by 1 year.

4. Instructions After the Free Update Period Expires

- Users may continue using the existing database version already downloaded. However, new database versions released after the expiration of the service period will not be available.
- Users may renew the database update service at any time by purchasing a renewal card. Each successful renewal will extend the update service validity by 1 year.

This notice will take effect on April 1, 2026.
