

B2331 VEHICLE NEEDS DEGAUSSED

- 1). When Monitored:
Vehicle speed greater than 10 mph.
- 2). Set Condition:
The magnetic field around the vehicle is greater than 2.4 gauss.

Diagnostic Test

- 1). PERFORM THE VEHICLE DEMAGNETIZING PROCEDURE
NOTE: A blank compass display indicates that vehicle degaussing is required.
NOTE: After demagnetizing, the vehicle will enter Auto Fast-Cal when the ignition is turned on.
NOTE: Ensure that the correct compass variance is stored in the compass memory. See "Setting Compass Variance" in the Service Information.
View repair.
Repair
